

## Asociación Comité ambiental de Cabañas en Defensa del Agua y la Cultura CAC.

This Sunday morning, new threats were sent to the cellular telephone of Ludwin Franklin Iraheta, one of our young volunteers from our communications work-area. These are in addition to the threats he received on the webpage for the internet radio he coordinates. We are worried by this situation because before the prior the murders of environmentalists in the department of Cabañas, there were initial threats, the result of which lead the deaths of two of our *compañeros* and one of our *compañeras* of the Environmental Committee of Cabañas. Ludwin has proven that he does not have any problems with anyone and the only thing he has done is talk about various environmental and political issues on the internet radio station, which we have named Guaco Radio. He began to receive threats after that. He, as well as all of us, fear for our lives, and that is why once again we are calling for solidarity with our situation. We also urgently call on the authorities to do their part. The people intimidating Ludwin can be found, and because we cannot say with complete certainty who those people are, it is the responsibility of the authorities to investigate. That way we will know what is happening and the threats, which clearly show the vulnerability faced by those of us who work on environmental issues in the department, will end once and for all.

These are the messages that our *compañero* Ludwin received:
